Matthias Liffers will discuss research data management at Curtin University and the facilities available to researchers.

Rebecca Lange will introduce the Curtin Institute for Computation and the power of computation in the humanities.

Marilyn Coen will take the second part of the session. She will focus on effective database searching to find research information in your field using the most relevant databases for you. Once you have found your information, what will you do with it? Learn how to manage your carefully selected resources.

Curtin University Doctoral or Master (including coursework) students, honour students, early career researchers and supervisors welcome. (Please note our seminars do not meet the supervisor registry requirements).

RSVP

RSVP is essential. Please RSVP to humgraduatestudies@curtin.edu.au.

Please check your email regularly for the latest information on seminars including venues and times.
